

Management responsibility statement

The PhosAgro management hereby confirms that, to the best of its knowledge, the financial statements prepared in accordance with the International Financial Reporting Standards as issued by the International Accounting Standards Board give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and the undertakings included in the consolidation taken as a whole.

The management report includes a fair review of the development and performance of the business and the position of the PhosAgro and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face.

This Integrated Annual Report was reviewed and approved at PhosAgro's Board of Directors meeting on 20 April 2023.

The consolidated financial statements for the year ended 31 December 2022 were approved by the Board of Directors on 03 March 2023.

Independent Auditor's Limited Assurance Report

To the Management of Public Joint Stock Company "PhosAgro":

Introduction

We have been engaged by the Management of Public Joint Stock Company "PhosAgro" (hereinafter – the "Company") to provide limited assurance on the selected information described below and included in the Integrated Annual Report of the Company for the year ended 31 December 2022 (hereinafter – the "Integrated Annual Report"). The Integrated Annual Report represents information related to the Company and its subsidiaries (hereinafter together – the "Group"), unless otherwise stated in the Integrated Annual Report.

Selected information

We assessed the quantitative and qualitative information specified in Appendix 1 that is disclosed in the Integrated Annual Report and referred to or included in the GRI Content Index of the Integrated Annual Report (hereinafter – the "Selected Information").

The scope of our limited assurance procedures was limited to the Selected Information for the year ended 31 December 2022 only. We have not performed any procedures with respect to earlier periods or any other items included in the Integrated Annual Report and, therefore, do not express any conclusion thereon.

Reporting criteria

We assessed the Selected Information using relevant criteria, including reporting requirements in the GRI Sustainability Reporting Standards 2, 3, 202, 203, 205, 207, 302, 303, 304, 305, 306, 401, 403, 404 and 413 (hereinafter – the "GRI Standards") published by Stichting Global Reporting Initiative and in the Group's management methodology as set forth in the criteria defined in the notes to the Group's specific disclosures in the Environmental review section of the Integrated annual report (hereinafter – the "PhosAgro Methodology", and together with the GRI Standards – the "Reporting Criteria"). We believe that the Reporting Criteria are appropriate given the purpose of our limited assurance engagement.

Responsibilities of the Group's management

Management of the Group is responsible for:

- designing, implementing and maintaining internal control relevant to the preparation of the Selected Information that is free from material misstatement, whether due to fraud or error;
- establishing internal methodology and guidelines (including the PhosAgro Methodology) for preparing and reporting the Selected Information in accordance with the Reporting Criteria;
- preparing, measuring and reporting of the Selected Information in accordance with the Reporting Criteria; and
- the accuracy, completeness and presentation of the Selected Information.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the Selected Information is free from material misstatement, whether due to fraud or error;
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the Management of the Group.

This report, including our conclusion, has been prepared solely for the management of the Group in accordance with the agreement between us, to assist management in reporting on the Group's sustainability performance and activities. We permit this report to be disclosed in the Integrated Annual Report, which will be published on the Company's website¹, to assist management in responding to its governance responsibilities by obtaining an independent auditor's limited assurance report in connection with the Selected Information. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the management of the Group for our work or this report except where the respective terms are expressly agreed between us in writing and our prior consent in writing is obtained.

Professional standards applied and level of assurance

We performed our limited assurance engagement in accordance with International Standard on Assurance Engagements 3000 (Revised) "Assurance Engagements other than Audits or Reviews of Historical Financial Information", issued by the International Auditing and Assurance Standards Board.

A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

Our independence and quality management

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour, and the ethical requirements of the Auditor's Professional Ethics Code and Auditor's Independence Rules that are relevant to our limited assurance engagement in respect of the Selected Information in the Russian Federation.

Our firm applies International Standard on Quality Management 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Work done

We are required to plan and perform our work in order to consider the risk of material misstatement of the Selected Information. In doing so, we:

- made enquiries of the Group's management, including the Group Sustainability Reporting (SR) team and those with responsibility for SR management and Group SR reporting;
- conducted interviews of Group's personnel responsible for the preparation of the Integrated Annual Report and collection and analysis of underlying data;
- performed analysis of the relevant internal methodology and guidelines (including the PhosAgro Methodology), gaining an understanding of the design of the key structures, systems, processes and controls for managing, recording, preparing and reporting the Selected Information;
- performed limited substantive testing on a selective basis of the Selected Information to check that data had been appropriately measured, recorded, collated and reported; and
- reviewed the Selected Information for compliance of the disclosures with the relevant requirements of the Reporting Criteria.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

¹ The maintenance and integrity of the Company's website is the responsibility of management; the work carried out by us does not involve consideration of these matters and, accordingly, we accept no responsibility for any changes that may have occurred to the reported Selected Information or Reporting Criteria when presented on the Company's website.

Reporting and measurement techniques

Under the GRI Standards there is a range of different, but acceptable, reporting and measurement techniques. The techniques, together with the PhosAgro Methodology, can result in materially different reporting outcomes that may affect comparability with other organisations. The Selected Information should therefore be read in conjunction with the methodology used by management in preparing the Integrated Annual Report, described therein, and for which the Group is solely responsible.

Limited assurance conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Selected Information for the year ended 31 December 2022 has not been prepared, in all material respects, in accordance with the Reporting Criteria.
